The Coding School presents

WEB CODING

Learn Web Building & Design using **HTML**, **CSS** & **JavaScript**

Computer Programming:

- is like a foreign language; the earlier you start learning how to code, the easier it becomes
- gives you the competitive edge for colleges and jobs
- improves computational & critical thinking skills and provides infinite web-building creativity

4TH – 8TH grade students will build their own webpages using HTML, CSS & JavaScript. They will learn new & valuable web-building skills, enabling them to import content, create design, code action onto their webpages and even host their webpage online.*

1ST – 3RD grade students will develop computational thinking skills while learning the essential concepts of coding. Using drag and drop programming, games, and projects, students will learn about algorithms, functions, input and output, conditional statements, and more coding essentials!

*Newcomers to coding are welcome & if you've had coding I, your previously learned skills will be a plus!
