

Vote YES on MEASURE BH

“Building a brighter future!”

FPPC# 1404150

Thank you for your support of Measure BH!

Overview of Measure BH

The five-member Beverly Hills Unified School District (BHUSD) Board of Education unanimously voted to place the \$385 million “Measure BH” on the ballot for the June 5, 2018 election. Measure BH’s key objectives are to (a) make critical building repairs and upgrades for health and safety, (b) dramatically enhance the safety and security of our students, (c) provide technology-rich learning environments that meet the enormous career challenges of the 21st century, and (d) remediate and repurpose the Beverly Hills High School oil field.

a. Measure BH Funds Critical Building Repairs and Upgrades for Health and Safety

Our schools are outdated and in serious need of upgrades. Measure BH provides the funds required to continue BHUSD’s second phase of its construction program, including completing El Rodeo School, renovating the historic auditorium at Hawthorne School, and modernizing the performing arts wing and constructing new athletic fields, a gymnasium, and a pool at Beverly Hills High School, as well as other critical repairs and upgrades throughout each of the five BHUSD school sites.

b. Measure BH Protects Our Students

Measure BH will dramatically enhance the safety and security systems and infrastructure at Beverly Hills High School, Beverly Vista School, El Rodeo School, Hawthorne School, and Horace Mann School. Measure BH will significantly strengthen our students’ protection. Measure BH will upgrade the fire systems, life safety systems, security lighting, and door access control systems; install permanent fencing, electronic locks, panic alarms, and surveillance cameras; and improve ADA accessibility.

c. Measure BH Provides 21st Century Education Technology for Our Students

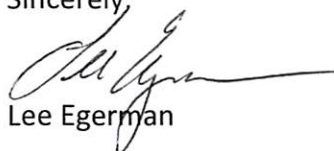

Measure BH funds will deliver the additional technology and resources needed to prepare our students for the enormous career challenges facing them in the 21st century. Measure BH will provide students and staff with advanced education technology, including secure online internet access and state-of-the-art computing devices.

d. Measure BH Remediate and Repurposes the Oil Field

Measure BH will fund the final phase of the BHUSD Oil Well Remediation Plan to restore the Beverly Hills High School oil field and repurpose it as field space for the school and the community.
